

BRINGING THE SHOWROOM TO THE CUSTOMER

EXECUTIVE SUMMARY

Representing 28 brands across multiple territories, Eastvaal Motors is already a dominant force in South African automotive retail.

In the coming years customer journeys will evolve faster than ever before...

Twintech would like to work with **Eastvaal Motors** to increase income, improve customer engagement, and take its already world-class digital UX to the next level.

We propose a 360° Retail Digital Twin to digitise showrooms and used-vehicle yards, enabling customers to virtually tour facilities, interact with vehicles, and engage with sales consultants remotely.

The result is higher lead conversion, improved customer trust, and differentiated market positioning.

DIGITAL TWINS : A PERFECT FIT FOR EASTVAAL

28 Brands, One Destination (The Hub)

Current dealership website menus are slick and eye-catching, but, similarly to online TV streaming services, the menus can feel cluttered and overwhelming. We'll present Eastvaal's virtual showrooms (either full Matterport scans or custom designed virtual spaces) as a fully interactive virtual tour that visitors can explore from any device with a web-browser. This would help create a uniform, premium standard across your entire dealership footprint.

Visitors land in a branded virtual lobbies and can also seamlessly navigate to specific manufacturers' own showrooms when appropriate.

Visual Comparative Shopping

Customers can view different to-scale models side-by-side, visually gauging size and presence just as they would in real life.

Aligning with Global Trends

As leading automotive groups around the world continue to digitise and reduce physical floor space, our digital showrooms ensure you maintain inventory visibility without the physical overheads.

Several brands in Eastvaal's current portfolio already utilise Digital Twins to great effect - we are simply bring this capability to the local dealer level!

From Lead to Buyer

Customers research online first. By offering a remote walkthrough and an exciting elevates UX we can convert more browsers into buyers.

THE BUSINESS CASE

Premium Brand Experience

Secure a competitive advantage by positioning Eastvaal as a digital-first automotive group, setting the standard for modern retail locally.

Increased Vehicle Sales

Virtual showrooms significantly expand your reach, driving 20 - 40%* higher lead conversion rates compared to traditional static listings.

IMPLEMENTATION ROADMAP

PHASE 1: THE PILOT & HUB CREATION

We begin by creating a single digital twin of a flagship dealership (such as Eastvaal Motor City Witbank) as a proof-of-concept.

- Full 360° scan of the
- primary showroom (up to 1,000m²).
- Creation of the Eastvaal Multi-Brand Hub interface and integration into your
- existing website.
- Population of all vehicle data, marketing material, and brand assets.

PHASE 2: NETWORK EXPANSION

Once the pilot is live, we will take learnings and proceed to roll out the technology across the wider group.

- Scanning additional brand dealerships and/or the
- pre-owned vehicle yards.
- Creation of the any
- additional virtual showrooms for dealerships and second hand lots.
- Ongoing new stock and other digital twin updates.

FEATURES

- VR-ready dealership walkthroughs.

- Interactive points of interest: model spec sheets, videos, options and links to test-drives.

COSTING STRUCTURE

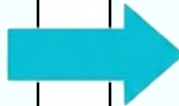

PHASE 1: STARTER PACK
